BUL 3320 Business Law

This course is comprised of a study of the nature, classification and characteristics of law including the study of jurisdiction and functions of the court system, torts, crimes, government regulations of competition, environmental law, contracts, and sales of goods.

University of Tampa

BUS 101 Introduction to Global Business

This course emphasizes global competitiveness by introducing students to the way companies operate and to how they compete with other companies. In addition, students learn about the importance of leadership, ethical behavior and corporate responsibility in becoming successful and sustaining that success. The course examines each of the functional areas in businesses and how they work together to produce the goods and provide the services that customers demand.

MGT 330 Principles of Management

This course studies the evolution and practice of the core management functions of planning, organizing, leading and controlling. A strong emphasis on leadership skills is integrated into the course content to provide the student with a framework with which to translate classroom theory and practice into individual and team performance in the accomplishment of organizational objectives.

MGT 345 Global Organizational Behavior

This course examines the influence of individual differences, ethnic, and national culture on behaviors in organizations. It addresses the questions of when and how to be sensitive to these issues, and develops skills required to effectively manage in the diverse environment of the 21st century. Within this context, the course focuses on six essential skill-building areas: managing diversity, team building, communicating, motivating, negotiating and conflict management, and creativity and critical thinking.

MGT 360 Sustainable Development

Introduction to sustainable business. Interdependent relationship of technological and social change with emphasis on evolution of models of production and service delivery and organizational structure and functioning. Impact of demographic composition, environmental resources, economic and political structures.
